MAIN PRODUCT FEATURES

Selenium is an important trace mineral that accounts for major functions in our body and is found rarely in foods in absorbable amounts.

- **Selenium:** Selenium is a trace mineral that is essential for good health but required only in small amounts. Selenium is incorporated into proteins to make selenoproteins, which are important antioxidant enzymes. The antioxidant properties of selenoproteins help prevent cellular damage from free radicals. Free radicals are natural byproducts of oxygen metabolism that may contribute to the development of chronic diseases. Other selenoproteins help regulate thyroid function and play a role in the immune system. Added natural vitamin E makes this formulation more efficient to prevent cell damage.
- **Pumpkin seeds:** Pumpkin seeds are not only a highly rich source of natural antioxidant vitamin E in the all form of alpha-tocopherol it also contains conventional mineral antioxidants like zinc and manganese. It gives the best mineral support to our body.
