

GT Plus ChlorophyllTM

Potent Green Tea Extract

Powerful and Legendry Antioxidant

GT Plus Chlorophyll powerfully supports:

- A Strong Immune System*
- Healthy skin and healthy aging*
- Healthy Energy Levels*
- Healthy Circulation*

LIKELY USERS:

People wants antioxidant protection; Those trying to control Cholesterol; People with high levels of inflammatory iron, including eaters of red meat; Those seeking to avoid caffeine, but wanting the benefits of green tea.

KEY INGREDIENT(S):

- Green Tea Extract (Camellia Sinensis)
- Chlorophyll

MAIN PRODUCT FEATURES:

Catechins (including EGCG), are the main active ingredients in green tea, which act as antioxidants and bind iron, which may prevent some iron dependent inflammation. Contains 80% less caffeine than one cup of green tea drink per serving.

OTHER IMPORTANT ISSUES:

- Highest dose in one capsule.
- One capsule contains as much EGCG as about six cups of green tea with low caffeine.
- Green tea may correct cholesterol imbalances by raising HDL and lowering LDL cholesterol, while preventing LDL from oxidizing. Oxidized cholesterol is a key risk factor of cardiovascular disease.
- Green tea may also be a mild anticoagulant, or “blood thinner.”
- Green has been shown to help maintain levels of desirable intestinal bacteria.

SUGGESTED USE:

One to three a day, preferably with meals. Three to four capsules would provide about the same antioxidant benefits as ten cups of tea, an amount used successfully in some studies.
